

# E-Store

Ordering made easy

## Our E-Store service offers you:

- rapid ordering and order history
- 24-hour orders without borders
- high security and improved efficiency

# Ordering made easy

E-Store is an online ordering system for Perstorp products that is accessed via our Internet home-page at [www.perstorp.com](http://www.perstorp.com). We have created the E-Store to make it quicker and easier for you to send us orders whenever you want.

Orders are sent directly to Perstorp's ERP system for swift handling, and the three-month order history allows you to readily track your order information with regard to order status, shipping dates and Certificate of Analysis.

Once you have registered as a Perstorp customer, you will also gain access to relevant documents, including the E-Store Handbook that will guide you through the few steps required to become quickly familiar with our online order handling system.

## How to register

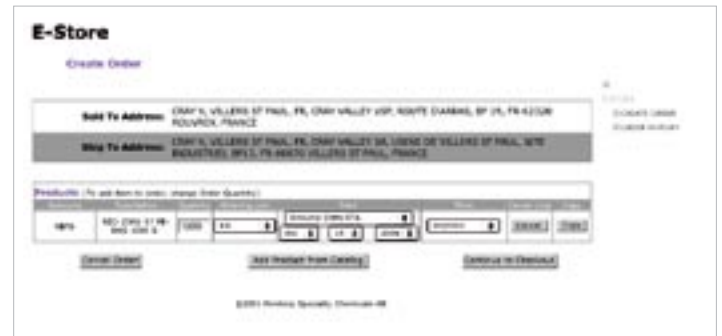

You can register yourself as a new customer to E-Store by:

- Clicking on "Login" under the "Customer Login" subtitle on the Perstorp homepage at [www.perstorp.com](http://www.perstorp.com). Then on the next page click on "Sign up" to register your details.
- Contacting your local Perstorp Sales or Service representative.

Visit us at [www.perstorp.com](http://www.perstorp.com) to find out more about us and our products.

## Order overview

Five main functions offered by E-Store are briefly described below.

**Order entry using "Create Order"**: used when placing the very first order or subsequent orders. You can pick out the product(s) you want to order from your particular customer catalog that lists all the relevant products having a valid quotation. You can check the order acknowledgement from Perstorp as final confirmation. No pricing details are given via the Internet. The order will match the price agreed with your Perstorp Sales representative that is valid for the period during which your order is scheduled for shipment.

**Order entry using "Order History"**: the most usual way of placing an order simply by accepting or changing the entries made on an old order.

**Shipping details**: the "Shipping History" screen presents information such as product lot number(s), shipping date from Perstorp, carrier name, and container/truck number.

**Order modification**: you can change an order up to 24 hours before shipping. **Print Certificate of Analysis**: when an order receives the status "Shipped", you can view the Certificate of Analysis (CoA) and print it out by clicking on COA.
