

Perstorp and REACH

REACH Product Information Sheet

Concerning Perstorp products relevant to REACH registration..

Pre-registration information

The Pre-registration phase was closed December 1. Below please find a list of the products (REACH relevant substances) pre-registered by the Perstorp Group.

Registration information

All relevant substances in Perstorp products will be registered within REACH deadlines.

Exposure Scenarios (ES) will be created when requested, to cover the uses decided in the Chemical Safety Report in cooperation with our customers. (ES strategy see Information letter no 9.)

SDS

All SDS affected by REACH will be revised. This extensive SDS revision not only depends on the REACH regulation but also on GHS (CLP within EU), the new classification, labeling and packaging requirements.

The updated SDS will automatically be sent to our customers. There is also a possibility to order SDS by a simple procedure on the website www.Perstorp.com.

This Information letter will be revised once a month and new Registration Numbers will be provided.
