Perstorp

A Subsidiary of PETRONAS Chemicals Group

Future-proof rPET hot cup lids with high PCR content

Perstorp and Göncay Plastik have partnered to develop a next-generation hot cup lid that closes a long-standing gap in foodservice packaging.

Until now, brands have had to choose between heat resistance, performance, and recyclability. This new solution removes that compromise - responding to PPWR and growing demand for circular alternatives.

Recyclable by design

Compatible with existing PET recycling streams

Enables high PCR content

rPET-based solution contributing to reduced reliance on virgin materials

Heat resistance

Enabled by Akestra™, making rPET suitable for hot beverage applications

Proven performance

Maintains shape under heat, with secure fit and reliable sealing

Ready for scale

Designed for industrial production and adoption by global brands
