

# Formalin LM 37

## Description

- ⇒ Formalin LM 37 is an aqueous solution of formaldehyde.
- ⇒ The product is clear and colourless and has a pungent, irritating odour.
- ⇒ For additional information on formaldehyde follow the links [www.formacare.org](http://www.formacare.org) or [www.formaldehyde.org](http://www.formaldehyde.org)

## Sales specification

Formaldehyde content, % <sup>1</sup>	36.7±0.3
Methanol content, % <sup>2</sup>	Max. 1.0
Formic acid content, % <sup>3</sup>	Max. 0.025

## Applications

- ⇒ Formaldehyde is a very reactive chemical and its main use is as a chemical intermediate and building block in the chemical industry.
- ⇒ It is widely used in the production of UF, MF and phenolic resin production.
- ⇒ Other major areas of use are in the production of BDO and MDI as well in the production of polyoxymethylene and polyalcohol's.

## Delivery forms

- ⇒ Heated tank trucks

## Storage

- ⇒ Use insulated storage tank with constant heating and agitation.
- ⇒ The lowest recommended storage and transport temperature is 40 °C.
- ⇒ Do not store longer than one month.

Analytical Method

<sup>1</sup> 1068, <sup>2</sup> 1234, <sup>3</sup> 1230
