

Formic Acid 75%

Product Description

Formic Acid is a colorless carboxylic acid, 75% solution in water. Formic Acid is used in the leather tanning process, in various chemical processes as raw material for synthesis, as an auxiliary chemical or pH-adjusting etc. It is also a feed premixture. Formic Acid 75% is a clear colorless, corrosive fluid with a pungent irritating odor. Miscible with water and alcohols in all proportions.

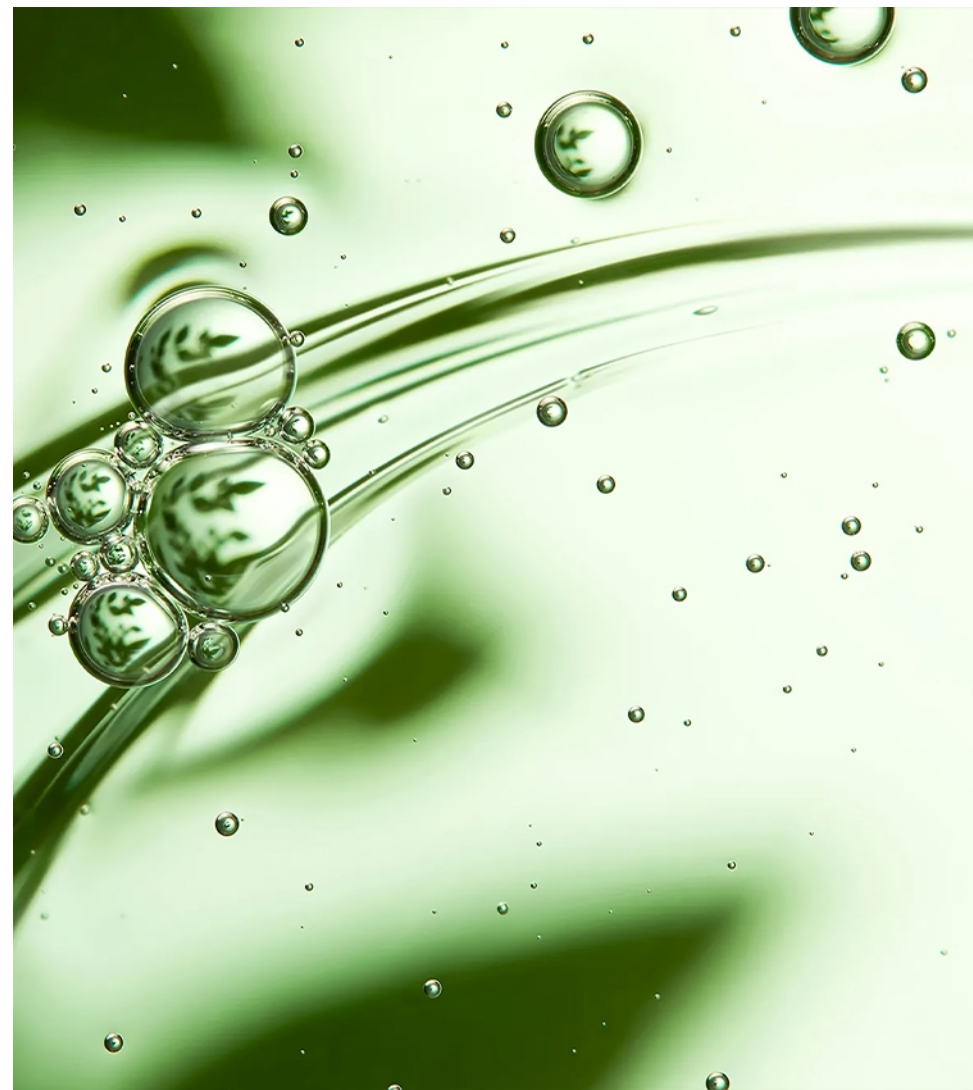

Segment Applications

Textile industry for dyeing and impregnation, Leather industry for tanning, dyeing and sterilization of skins and hides, Chemical processes as raw material for synthesis, as an auxiliary chemical or pH-adjuster, Waste water treatment, Cleaning fluids, Animal feed.

Delivery Forms

Bulk

IBC 1180 kg

Formic Acid 75%

Sales Specification

Characteristics	Unit	Specification	Analytical Method ¹
Formic acid content	%	75-78	PO 309

1. Internal analytical methods are available on request

General Characteristics

Characteristics	Unit	Typical Value ¹
Color	APHA	10

1. Typical values are for information only and not part of sales specification

Handling and Storage

Handle, use and store according to the safety data sheet and exposure scenario(s).

For users of the premixtures, feed business operators shall establish operational procedures and appropriate organizational measures to address the potential risks resulting from its use. Where those risks cannot be eliminated or reduced to a minimum by such procedures and measures, the additive and premixtures shall be used with personal protective equipment including skin, eye and breathing protections. The simultaneous use of different organic acids or their salts is contraindicated where one or more of them is used at or near the maximum permitted content.

Regulatory information

EU REACH registered
 Premixture according Regulation (EC) No 1831/2003
 Fulfills Regulation (EC) No 183/2005 and Directive 2002/32/EC
 FAMI-QS certified manufacturing unit.
