

ProPhorce™ AC 600

The leading edge of performance and safety

Product Description

ProPhorce™ AC 600 is a strong feed acidifier that can be used in feed mill or on farm. ProPhorce™ AC 600 is suitable for use in feed and water for monogastric animal production systems. ProPhorce™ AC 600 is a formula combining the strong and well established effects of formic acid with safer handling due to the sodium buffering technology.

Formic acid is known to improve Average Daily Gain (ADG) and Feed Conversion Ratio (FCR) in animal production. ProPhorce™ AC 600 has proven to be equally effective as straight formic acid on these parameters.

Segment Applications

Strong acidifier

Bacterial control

For use in feed

For use in water (Adjust dosage to reach correct pH for optimum efficacy of the product and discuss with your local sales manager. Swine pH target 3,5 – 4,0 and poultry target pH 3,8 – 4,0)

Delivery Forms

IBC 1350 kg, bulk

ProPhorce™ AC 600

- Feed preservative
- For use in feed and water
- Non-ADR

ProPhorce™ AC 600

The leading edge of performance and safety
