

ProPhorce™ SR 130

An unrivaled foundation
to power production

Rock solid butyric acid performance for sows

- High quality butyrins: targeted delivery of butyrate through esterification
- Optimizes the development of the gastrointestinal tract
- Ensuring a better foundation for heavier weaned piglets

Reliable

A strong foundation for better gut functionality

Successful sow producers value gut health. And they're right to – gut functionality is a foundation for future performance and production success. Choosing ProPhorce™ SR 130 ensures you have the strongest foundation for a better lifetime performance.

Optimize production costs with targeted delivery of butyrate

With butyric acid, you have the potential to improve nutrient absorption and enhance animal performance. Now you need the most precise way to deliver butyrate to the small intestine, where it's most needed.

The advanced esterification technology of ProPhorce™ SR 130 provides the answer, with targeted delivery of butyric acid – unrivaled power that's up to double that of coated butyric acid products.

This makes ProPhorce™ SR 130 the foundation you need to maintain and improve gut health, and meet your production targets.

- Reduced production losses
- Lower application costs: compared to other butyric acid-based products, esterified ProPhorce™ SR 130 delivers an optimal amount of butyrate
- Less wastage, since you can give consistent and precise dosages

For rock solid performance and cost optimization, nothing rivals ProPhorce™ SR 130. It's the pioneering butyric solution that helps you achieve your production targets, with the backing of Perstorp, a company with 60+ years of experience in animal nutrition and a leader and pioneer in esterification technology.

Ensure production success

ProPhorce™ SR 130 helps to ensure a better foundation for heavier weaned piglets. Supporting your sow's energy balance in the challenging lactation phase will increase reproductive success as well as the production of high quality piglets. ProPhorce™ SR 130 contributes to production success in multiple ways, such as:

- Lower costs associated with antibiotic use (vet expenses, consultancy, medications, etc)

Key benefits

- Rock solid performance and reliable results
- Unrivaled butyric acid power
- Contributes to production success
- Odorless, stable, and easy to handle
- No dangerous goods restrictions

ProPhorce™ SR 130:

the benchmark for production success

Gut morphology: a fundamental tool for performance success

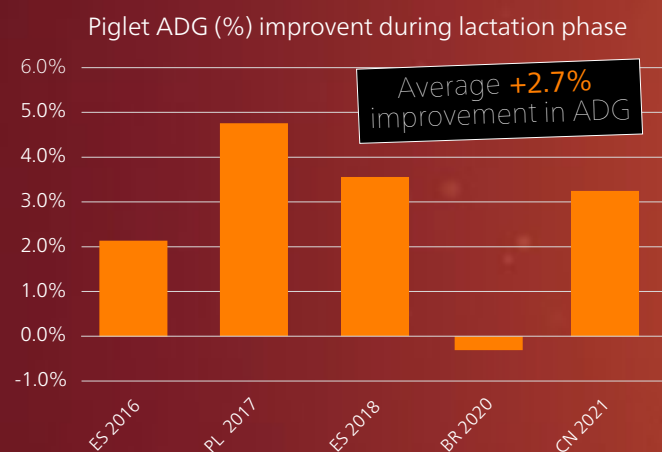

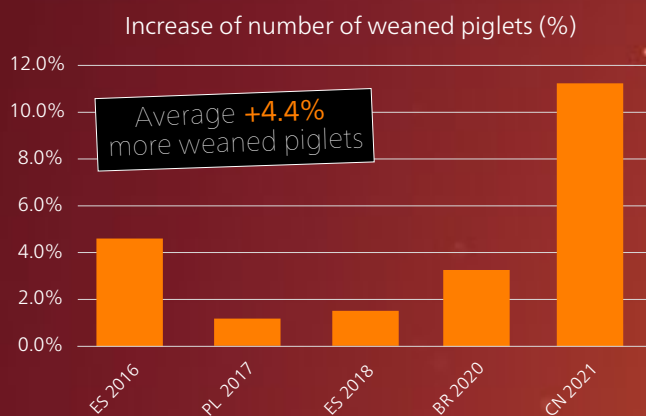

A well developed and functional gut ensures optimal feed utilization and reduces the waste of nutrients. The below table shows the effects of butyric acid on dietary nutrient digestibility in sows.

Digestibility (%)	CON	TB
Dry matter	94.10 ± 0.38A	94.94 ± 0.27B
Crude protein	85.37 ± 1.31	86.45 ± 0.90
Gross energy	80.48 ± 0.70A	81.58 ± 0.39B
Crude fat	74.75 ± 1.32a	77.41 ± 1.08b

CON, basal diet
TB, basal diet +500g/t butyric acid

Mean values with different letters (a,b) were significantly different (P<0,05).
Data are presented as mean ± SEM (n = 8).
