

Curalite™ Pro Ox C50

Pro-Environmental without compromising on performance

Product Description

Curalite™ Pro Ox is a Pro-Environmental alternative to Curalite™ Ox, ready to be dropped into existing formulations giving the same high performance as its fossil based alternative. Perstorp offers two grades of Curalite™ Pro Ox, based on 50% and roughly 20% renewable resources.

Curalite™ Pro Ox is a 3-ethyl-3-oxetanemethanol (Oxetane monoalcohol). It has two reactive groups: one hydroxyl and one oxetane. It is a clear colorless liquid with a molecular weight of 116 g/mol.

Segment Applications

Reactive diluent for cationic or hybrid radiation curing systems
Chemical building block

Delivery Forms

IBC 1000 kg
Steel drums 200 kg, 800 kg/pallet

Curalite™ range gives excellent dilution power, faster process, dimensional stability. The products enable dimensional stability and formulations of transparent formulations. Further, Curalite™ is a safe choice thanks to very low migration as the system continues to cure after radiation.

Curalite™ Pro Ox C50

Pro-Environmental without compromising on performance

Sales Specification

Characteristics	Unit	Specification	Analytical Method ¹
Purity	%	Min. 98.0	PO 145-1
Hydroxyl Number	mg KOH/g	475-495	PO 100-16
Water content	%	Max. 0.1	PO 109-10

1. Analytical methods are available on request

General Characteristics

Characteristics	Unit	Typical Value ¹
Color	APHA	10
Viscosity at 20 °C	mPas	27

1. Typical values are for information only and not part of sales specification

Pro-Environment Information

Renewable content is 50% based on mass balance concept.
ISCC PLUS certified product.

Handling and Storage

Curalite™ Pro Ox is hygroscopic and should be handled to prevent moisture absorption. Perstorp recommends storing this product in sealed containers at ambient temperature, in a dry area protected from direct sunlight and the elements.
