

ProMyr™ NT 510

Description

- ProMyr™ NT 510 is a mixture of formic acid and sodium formate
- The salt of organic acids has a very favourable influence on the products corrosive effect on machines which is strongly reduced compared to pure organic acids.
- The blend of formic acid and sodium formate contributes to an efficient product both with respect to pH-decreasing ability and prolonged storage stability in silage.
- More information is available on www.perstorpfeed.com.

Delivery forms

- Bulk

Applications

- ProMyr™ NT 510 is a silage additive.
- ProMyr™ NT 510 is effective when ensiling grass, clover and lucerne at a dry matter below 45 %.
- ProMyr™ NT 510 prevents efficiently growth of unwanted microorganisms in silage such as butyric acid bacteria.

Dosage

- Grass 3-4 litre/ton green fodder
- Grass-clover (< 25 % clover) 4-5 litre/ton green fodder
- Grass-clover (> 25 % clover) 5-6 litre/ton green fodder
- Clover, lucerne 6 liter/ton green fodder
