

# ProTain™ OT 102

## Why use it

- ⇒ Highly efficient protection against oxidation
- ⇒ Synergistic combination with chelating agents
- ⇒ Prevents loss of fat soluble vitamins A, D, E and K
- ⇒ Preserves pigment quality
- ⇒ Maintains palatability
- ⇒ Prevents loss of nutritional value
- ⇒ Prolongs shelf life
- ⇒ Thermo stable
- ⇒ Excellent free flowing characteristics
- ⇒ Good distribution in feed and premixes
- ⇒ Large surface area increases protection level
- ⇒ Contributes to a highly profitable production

## What's in it

- ⇒ Ethoxyquin (E324)
- ⇒ Butylated Hydroxy Toluene (BHT) (E321)
- ⇒ Phosphoric acid

## Where available

- ⇒ Western Europe
- ⇒ Southern Europe
- ⇒ Central and Eastern Europe
- ⇒ Asia
- ⇒ Southern America
- ⇒ Northern America

## Properties

Appearance	Beige free flowing powder		
Dosage	Compound feed	80 – 100	g/ton
	Premixes	Depending on inclusion rate to reach 80 – 100 g/ton in complete feed	
Packaging	25 kg bags		
Shelf life	Stable for at least 12 months after production date, stored in a dark and cool warehouse
