

Sodium Formate 30%

Description

- 30% Sodium Formate in water
- Sodium salt of formic acid
- Clear liquid at temperatures above 15°C (59°F)

Applications

- Production of sodium hydrosulphite
- Production of formic acid
- Leather tanning
- Enzyme stabilizer in detergents

Delivery forms

- Bulk deliveries in insulated, stainless steel tank trucks

Storage

- Sodium Formate, 30% Solution will precipitate if the product is stored below 15°C (59°F).

Sales specification

Sodium Formate content, % ¹ Min. 30

Typical properties

Color (10% aqueous), APHA ² 40

Analytical Method

¹ PO 124-2, ² PO 105-5

Analytical methods are available on request

CAS no.: 141-53-7

EC (EINECS) no.: 2054880

HS no.: 2915 12
