

## Your Winning Formula

The Perstorp Group is the world leader in several sectors of the specialty chemicals market. Few chemical companies in the world can rival its 130 years of success. Today we have a rich performance culture distilled from our long history and extensive knowledge in the chemical industry. That culture and knowledge base enables us to produce Winning Formulas for a wide variety of industries and applications.

Our products are used in the aerospace, marine, coatings, chemicals, plastics, engineering and construction industries. They can also be found in automotive, agricultural feed, food, packaging, textile, paper and electronics applications.

Our production plants are strategically located in Europe, North America and Asia and are supplemented by sales offices in all major markets. We can offer you fast regional support and a flexible attitude to suit your business needs.

If you want a partner for feed additives who can offer you focused innovation to enhance your product or application, which is delivered reliably and responsibly, look no further. We have a winning formula waiting for you.

# Perstorp Performance Additives

Feed additives that make a difference

# An innovative leader in the feed additive market

For over fifty years Perstorp has been developing a range of highly effective feed additives. Perstorp was one of the first companies to introduce acid-based silage additives to the market in the 1960s, and pioneered the use of lactic acid in formulas for acidifiers and antibacterials in the 1980s.

Perstorp is a basic producer of several raw materials that are used in the feed and agricultural industry, such as formic and propionic acid and their salts. Perstorp's business unit Performance Additives focusses exclusively on developing and supporting reliable and innovative feed additives.

Today, the range, quality and properties of our feed additives make a real difference in helping you to become more profitable.

**Our "Pro" lines for professionals**  
Perstorp's product lines are divided into a number of categories according to their application areas. These are presented to the right along with their core benefits.

<b>ProSid™</b>
Mould inhibitors and other solutions for preventing mould growth and eliminating the negative effects of mycotoxins
<b>ProMyr™</b>
Silage additives for the preservation of nutrients, minimizing bacterial spores and increasing the storage life and quality of roughage
<b>ProPhorce™</b>
Acidifiers, antibacterials, butyrins and feed preservatives for inhibiting the growth of pathogens, improving the digestibility of nutrients and managing overall gut health.
<b>ProFare™</b>
Enzymes for increasing the digestibility of feed and the nutritional value of feed ingredients.
<b>ProTain™</b>
Antioxidants for stabilizing feed ingredients and prolonging product shelf-life.

## The competence mix that makes the difference

Perstorp's outstanding product range is complemented with a competence mix that makes the difference in helping you become more profitable. Product innovation and R&D activities lead to feed additives that improve the nutritional value of feed and protect animal health.

Perstorp invests significantly in R&D to investigate the properties and applications of its feed additives. Not only is R&D carried out in our own laboratories, but also at acknowledged independent research institutes and universities. These trials are carried out to evaluate the effects of feed containing our additives, thus enabling us to develop innovative products and formulations for the feed industry that increase productivity for farmers.

## An extensive program of customer care

Our product knowledge is complemented with thorough technical support. Perstorp employs application specialists to promote good customer care through personal contact, discussing relevant feed topics, and following up our activities with you.

We take care of our customers by giving them personal attention, good technical support and a rapid response in satisfying their needs. And we make sure that our long experience in the feed industry is used to your benefit.

Strict quality control procedures are maintained in our own manufacturing facilities, which in addition to ISO standards are certified according to Fami-QS and/or GMP+, to ensure high product quality and the uniform content of formulations.

### Big yet responsive

Perstorp is big enough for a worldwide role and responsive enough to satisfy local needs. The Perstorp Group is a world leader in several sectors of the specialty chemicals market. Our production plants are strategically located in Asia, Europe, North America and are supplemented by sales offices in all major markets. The Perstorp Group currently employs approximately 2,200 people.

Perstorp Performance Additives employs over 50 people located at production sites and sales offices around the world. We can offer you fast regional support and a flexible attitude to suit your business needs.
