Formalin LM 51-NL

Description
- Formalin LM 51-NL is an aqueous solution of formaldehyde.
- The product is clear and colourless and has a pungent, irritating odour.
- For additional information on formaldehyde follow the links www.formacare.org or www.formaldehyde.org

Applications
- Formaldehyde is a very reactive chemical and its main use is as a chemical intermediate and building block in the chemical industry.
- It is widely used in the production of UF, MF and phenolic resin production.
- Other major areas of use are in the production of BDO and MDI as well in the production of polyoxymethylene and polyalcohol's.

Delivery forms
- Heated tank trucks

Storage
- Use insulated storage tank with constant heating and agitation.
- The lowest recommended storage and transport temperature is 55°C.
- Do not store longer than one month.
